

## STRINGS & COMMAND LINE ARGUMENTS

### Q1

- a) Compile and run the program `cl1a.cpp`
- b) Make sure you understand how it works.

### Q2

- a) Fix the syntax errors in `string.cpp` so that it compiles.
- b) Complete the code for the `reverseCase` function.

To see how the program works I've placed a compiled version on `rerun`  
`/home/glingard/string`
